Visalia Medical Clinic Expands Online Services

VISALIA – Visalia Medical Clinic, the largest private clinic in the San Joaquin Valley, is now offering greater patient convenience with an expanded web portal.

The website, accessed through vmchealth.com, now serves as a time-saving tool for patients. They can reserve and confirm appointments online – from home or work. They can also update basic personal information such as change of address, to save time at check-in.

When patients arrive at the clinic for an appointment, they can go to the VMC Patient Kiosk in the lobby and make their co-payment to further speed check-in at their physician's office.

“We know that patients appreciate the convenience of the web, and their time at the clinic is valuable,” noted Rick Strid, CEO of the Visalia Medical Clinic. “With our expanded web portal, we are able to offer greater convenience and better customer service.”

Technology is a focus for Visalia Medical Clinic because of its ability to help deliver improved health care and patient services, Strid continued. The web portal and investments in state-of-the-art imaging, including the new CT scanner and MRI, are part of the Clinic's ongoing efforts to offer superior technology.

“As quickly as technology changes today, especially in health care, it is a challenge to stay current but it is a focused mission of Visalia Medical Clinic,” Strid added.

Visalia Medical Clinic offers the expertise of more than 40 physicians, physical therapy, sleep lab, a diagnostic laboratory and a wide array of imaging technology all in one location at 5400 W. Hillsdale, Visalia. The clinic, which employs 240 people, is open Monday through Friday 8 a.m. to 5 p.m.; extended care hours are Monday through Friday 5 p.m. to 8 p.m., Saturdays from 8 a.m. to 5 p.m. and Sundays, 8 a.m. to 2 p.m. Also available is the full-service, on-site Boyd's Pharmacy.
